

Air Logistics Group is the world's leading cargo General Sales & Service Agent (GSSA).

Celebrating 24 years in the air cargo industry, this global organization has moved on significantly from the traditional 'General Sales Agent' that was established in the United Kingdom back in 1994.

The development of Air Logistics Group over recent years has been significant, and with the support of institutional investors, the Group now has service levels and cargo volumes equal to some of the largest airlines in the world.

The organization categorizes itself as an 'International Cargo Management' company where GSA services are just one element of the many cargo services that Air Logistics Group can provide.

This innovative approach allows any airline- large or small - in any region of the world to take advantage of Air Logistics Group's range of services and find a tailor made solution to meet their specific requirements.

Above all, Air Logistics Group prides itself on providing outstanding service to airlines and forwarders alike. Air Logistics is setting the industry standard, maintaining the highest level of customer service with strong efficiencies while also being a transparent and reliable partner.
